## **TAGLINE**

A musical postcard from Spain, told through lounge house music.

## **ELEVATOR PITCH**

Khabushka Vol. 3: Madrid is the first chapter of The España Capsule, an ongoing series of lounge house releases inspired by Spain.

Originally conceived in 2016 under the working title España before whereisko had ever visited the country, the project sat unfinished for almost a decade. Following multiple visits to Madrid and Barcelona, those original ideas were revisited and transformed into a completed body of work that blends travel, observation and personal growth through music.

## **ABOUT THE RELEASE**

Madrid combines warm house grooves, atmospheric textures and understated melodies to create a soundtrack for movement, focus and reflection.

Rather than documenting landmarks, the project captures atmosphere. The rhythm of a city. The feeling of discovery. The moments that remain long after a journey ends.

Created nearly ten years after the original sketches were recorded, Madrid represents the meeting point between inspiration and lived experience.

## **ABOUT THE ESPAÑA CAPSULE**

The España Capsule is an ongoing collection of music inspired by Spain.

What began as a folder of unfinished recordings in 2016 has evolved into a long-term creative project exploring place, memory and atmosphere through lounge house music.

Each release acts as a musical postcard, documenting experiences through sound.

Madrid is the first chapter.
